

Section 1 – New installation of AgOK

Note that once the Windows® application has been installed, it need not be installed again. Only the database will be updated on a monthly basis.

To facilitate use of the MS Access data, the buyer may install our [AgPublic application](#). The application need only be installed one time.

Please login as buyer on this link <https://www.sos.ok.gov/cfs/bulkorder/dataDownload.aspx>

Select “Download AgOk Setup.” for Microsoft Windows application.

OKLAHOMA SECRETARY of STATE

Business Services | Executive Legislative | Agricultural Liens | Open Meetings | Administrative Rules | International Protocol | Charitable Organizations

Download Instructions -Lien Data Download

The buyer may select to use a Microsoft Access version of the database. This version is recommended for Windows-based systems. Use of this database requires that Office 2000 or higher be installed on the system or that Microsoft Data Access Components (MDAC) be downloaded from the Microsoft web site.

To facilitate use of the MS Access data, the buyer may install our AgPublic application. The application need only be installed one time and defaults to the C:\Program Files\AgPublic folder. If the data is downloaded to the same folder each month, the application will simply load the current data set. If the data is saved to a different location, the application will have to be directed to that location from the File/Data menu. For technical information pertaining to the MS-Access download, please see the Windows-version installation instructions.

Welcome...

Select "Download now" for MS Access.

Click on a database version to download (monthly)

Data Update as of 2/20/2020

Name	Click to download
MS Access Recommended for stand-alone workstations or small networks, or where system resources are limited.	 Download Now
MSDE Recommended for client-server network environments where speed and power for multiple users are an issue	 Download Now

Install an optional application for searching the above data (Install once per workstation)

Name	Click to download
Microsoft Windows Application for use with the MS Access or Sql Server monthly data set.	 Download Now

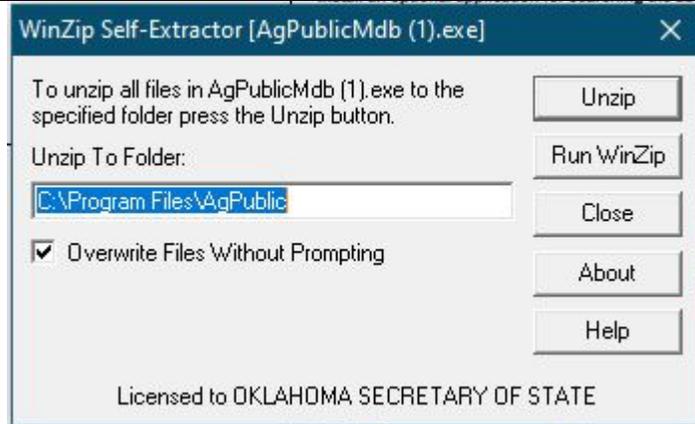

New to downloading?
Use this guide to get download instructions for the Windows Version.

After you click on the download link, you will see AgPublicMDB.exe downloaded. You need to open it up and click "Run".

Select "Unzip" to unzip the monthly data.

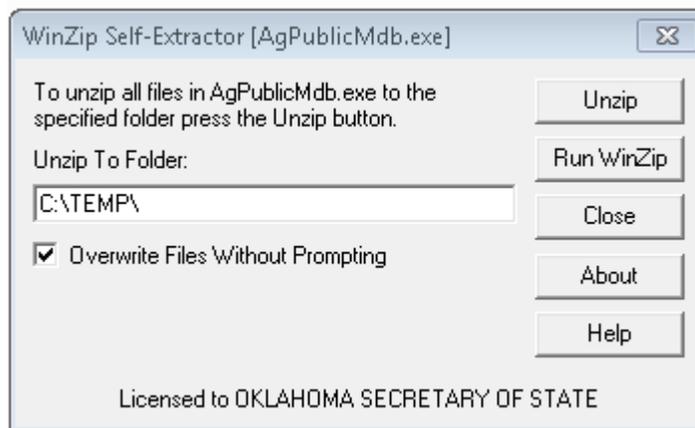

The Unzip will default to C:\Program Files\AgPublic.

If you are using XP machine, click "unzip"

If you are using WIN 7 and above, change the location to C:\TEMP

Click "Unzip"

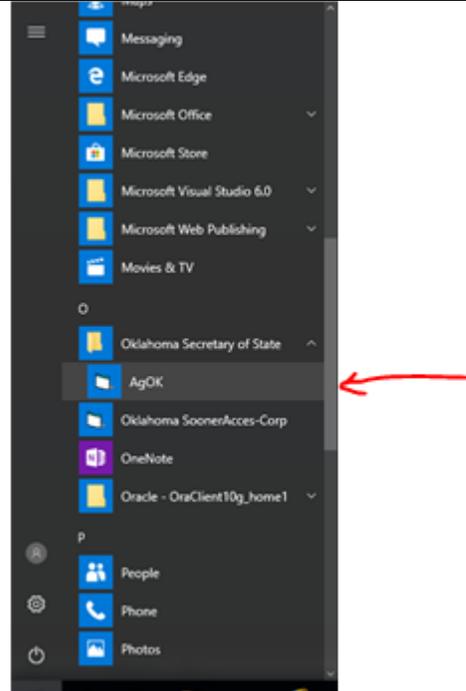

Section 3 – Setting properties for the AgOK application shortcut and setting the data file location

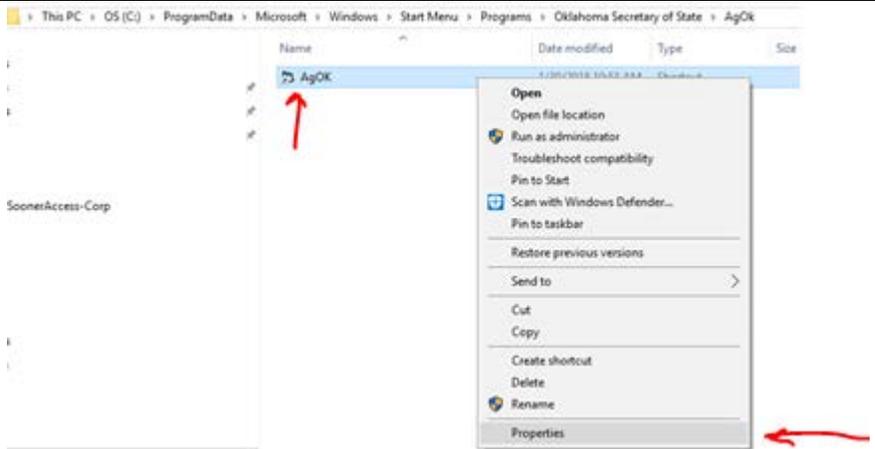

Set the AgOK application to “Run as Administrator”

Using the start button, browse to Oklahoma Secretary of State / AgOK and right click.

Select More / Open File Location

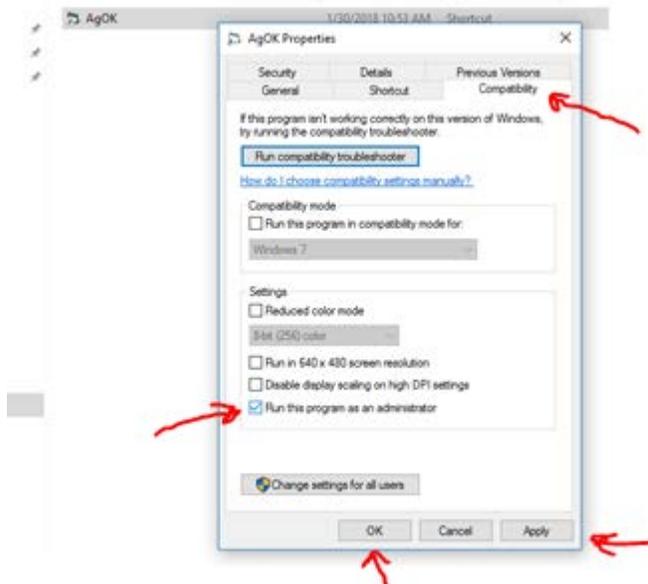

Once the file location opens, right click on the AgOK application and select “Properties”

Select the “Compatibility” tab and place a check mark next to “Run the program as an administrator”.

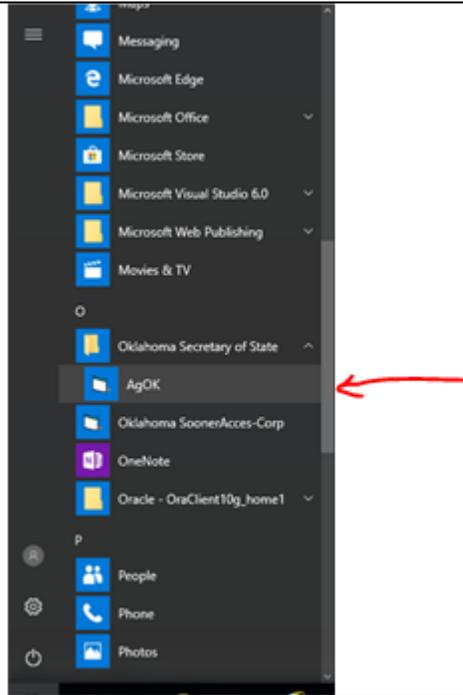

Click Apply and then click OK

Launching the AgOK application

From the start button, browse to Oklahoma Secretary of State and click “AgOK”

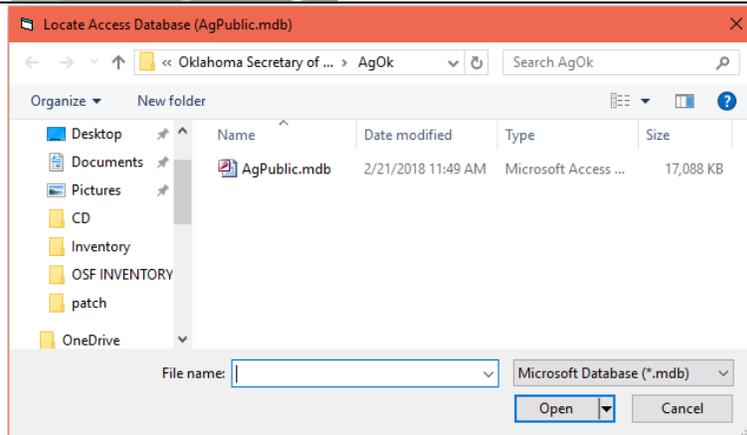

You should get a UAC confirmation box. Click “Yes”

Opening the AgOK application

If this is a new installation, you will be prompted to locate the agpublic.mdb file. Browse to the location of the downloaded data, like (C:\TEMP\). and click “Open”

Refer to previous “Windows Data Update” section of the installation to specify the location of the data file.

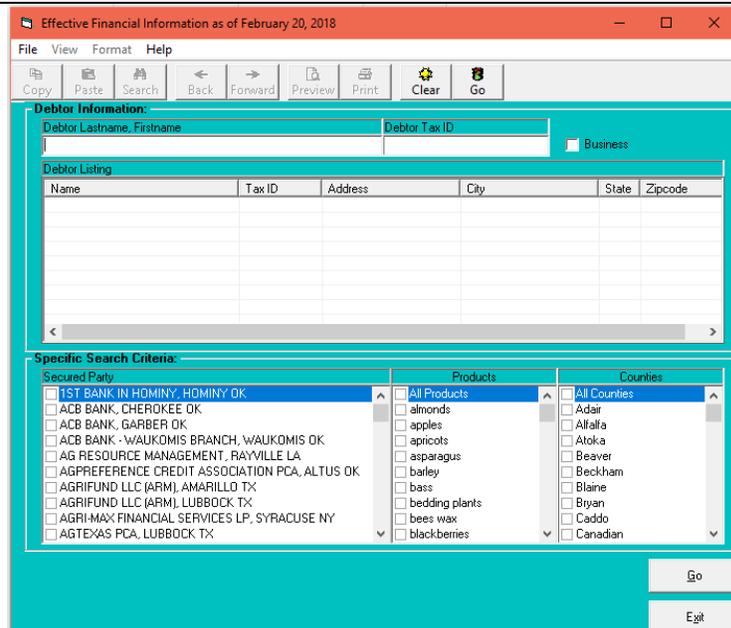

If you only updated monthly data, the application will launch without prompting to locate the data file.

The bar at top should show the current months information.

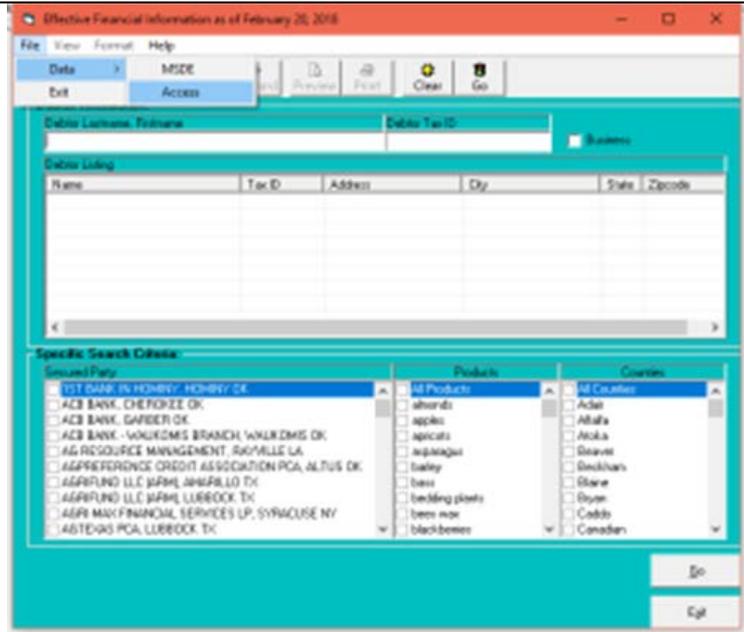

If not, you will have to navigate to the current downloaded database.

Click on File/Data/Access/ and browse to the location of the downloaded data, like (C:\TEMP\). and click “Open”

If you had an older installation of AgOK or AgPublic, you may have to navigate to the new location located in <C:\Program Files\Oklahoma Secretary of State\AgOk> or **C:\TEMP** depending on your operating system.

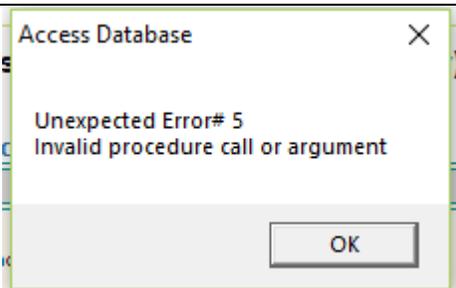

Click on File, Data, Access to navigate to the current months data.

Once you set the location of the data file, you will no longer need to specify its location when launching the application. It is important to always install the Windows Data Update to the same location for subsequent monthly data.

Section 4 – Unexpected Error

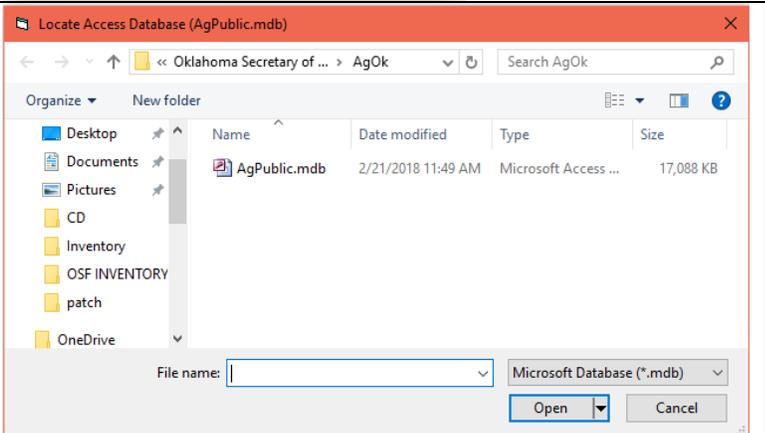

Issue Description:

Opening the AgOK application

If this is a new installation, you will be prompted to locate the agpublic.mdb file. Browse to the location and click “Open”

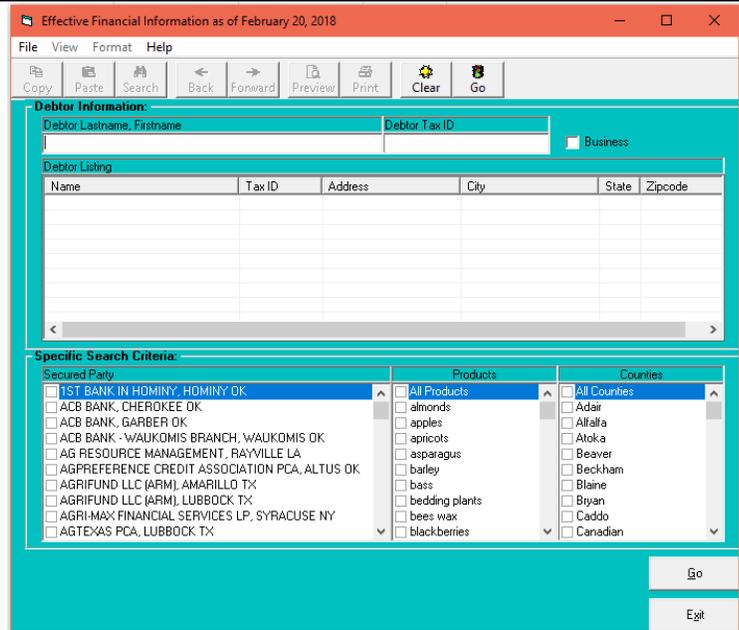

Refer to previous “Windows Data Update” section of the installation to specify the location of the data file.

If you only updated monthly data, the application will launch without prompting to locate the data file.

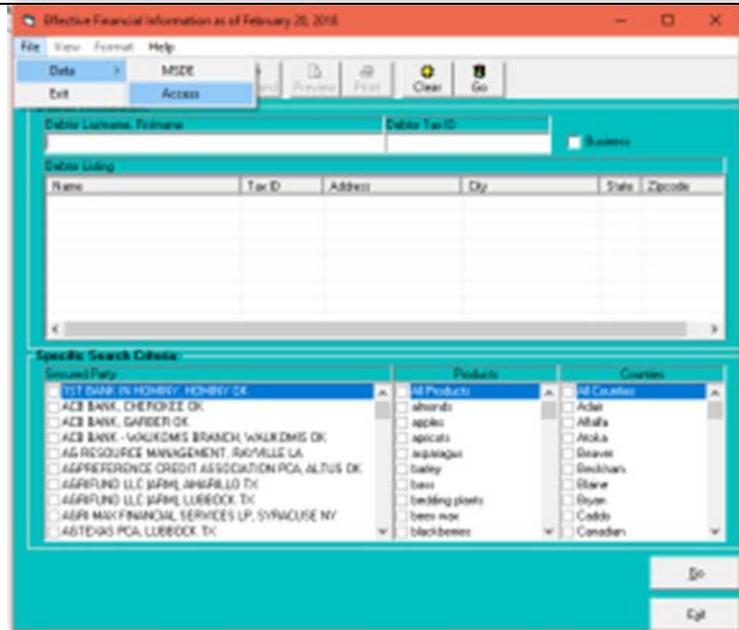

The bar at top should show the current months information.

If not, you may have to navigate to the current database.

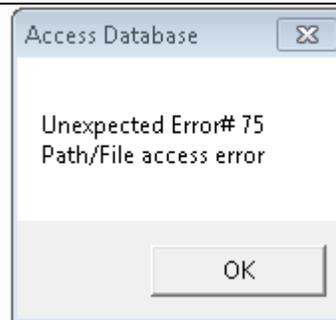

If you had an older installation of AgOK or AgPublic, you may have to navigate to the new location located in C:\Program Files (x86)\Oklahoma Secretary of State\AgOk or C:\Program Files\Oklahoma Secretary of State\AgOk depending on your operating system or location that data file.

Click on File, Data, Access to navigate to the current months data.

Issue Description:

Refer Section 2. Run as administrator and getting right folder

Issue Description

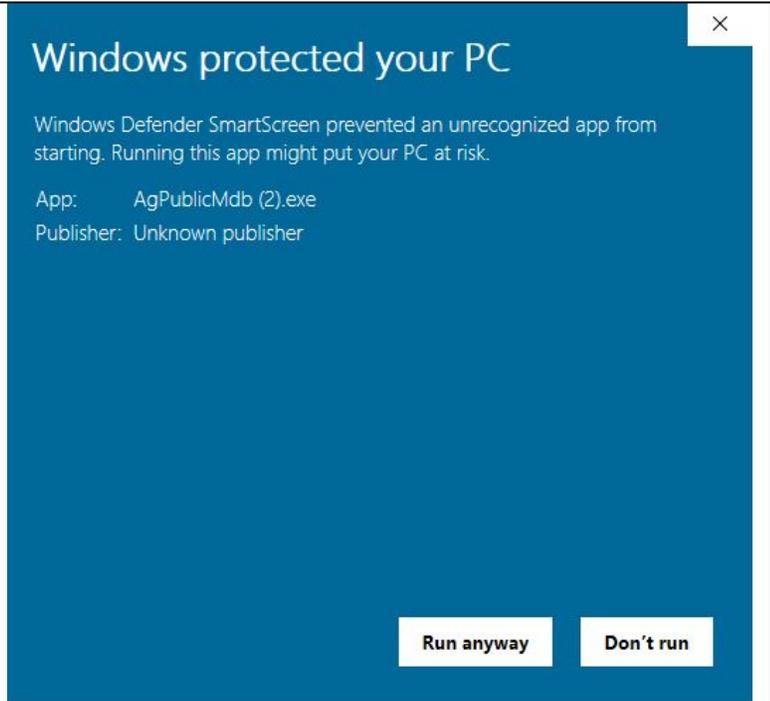

Not able to run application

Open Task manager, select AgOK.exe and click End task

Issue Description:

Security software like Symantec Endpoint Protection, Norton 360 or others may question downloading of the monthly data.

In this case, just click Run anyway.

Issue Description:

Old AgOk application print out all related last 4 SSN debtors.

We rebuild the application, please download the link below

<https://www.sos.ok.gov/BulkOrder/AgPublic/AgOk.exe>

The program will be download to your download folder and you will just need to copy/paste to your existing Agok folder. This will replace your current Agok application. Prior downloading, please close out the Agok system.
